When we first meet Kit, she's a fox. Nineteen-year-old Kit works for the research department of Shen Corporation as a phenomenaut. She's been "jumping"--projecting her consciousness, through a neurological interface--into the bodies of lab-grown animals made for the purpose of research for seven years, which is longer than anyone else at ShenCorp, and longer than any of the scientists thought possible. She experiences a multitude of other lives--fighting and fleeing as predator and prey, as mammal, bird, and reptile--in the hope that her work will help humans better understand the other species living alongside them. Her closest friend is Buckley, her Neuro--the computer engineer who guides a phenomenaut through consciousness projection. His is the voice, therefore, that's always in Kit's head and is the thread of continuity that connects her to the human world when she's an animal. But when ShenCorp's mission takes a more commercial--and ominous--turn, Kit is no longer sure of her safety. Propelling the reader into the bodies of the other creatures that share our world, The Many Selves of Katherine North takes place in the near future but shows us a dazzling world far, far from the realm of our experience.

Greyson can travel through time. It makes him the best private eye in the city. But this investigation will take him deep into the underworld. The clock is ticking, and he might be too late to discover the truth: The past is best left for dead.
